

# IN QUALITY WE TRUST

Trial data		St. Mary					Total
		Pathogenic	Likely pathogenic	VUS	Likely non-pathogenic	No mutation detected	
BGI	Pathogenic	217	1				218
	Likely pathogenic		4				4
	VUS		3*#	116	2		121
	Likely non-pathogenic			2	40		42
	No mutation detected					707	707
	Total	217	8	118	42	707	1092

Note:

\* These three cases are from SOLO1, SOLO2, and OlympiA trials respectively. BGI is conservative to interpret the mRNA splicing data. After discussion, BGI agreed to follow rationales from St Mary.

# The sample from SOLO2 went through fast track of St. Mary QC which didn't affect final report to patient.
